ABSTRACT -MAIN PROJECT

HOSPITAL MANAGEMENT SYSTEM (FEDERAL CARE HOSPITAL)

The Hospital Management System is a computer system that helps manage the information related to health care in the job completion of health care providers effectively .it is to computerize the Front Office Management of Hospital to develop software which is user friendly, simple, fast, and cost – effective. It deals with the collection of patient's information.

Features

- Improved Customer Services
- Improved Quality Control
- Unlimited User Support
- Improved time management

Requirements

- Patient Registration
- Appointment and Scheduling
- Doctors Information

User has to Login as Patient, Doctor OR Admin to use the system. From Patient's login, a user can Book an appointment with any doctor and check appointment history. From Doctor's login, a user can view Appointments. From Admin's login, a user has access to each and everything. Admin can manage doctors, patients, Add Doctor specialization, and check Doctor's and Patient's session logs. This system makes easy management of hospital for the patients as well as doctors.
